What does EY offer?

EY Academy of Business has been offering ACCA courses since 2005 in the CIS and since 2013 in Belarus.

What is the course methodology?

EY Academy of Business has adopted a proven and highly successful training methodology, practiced in Europe for more than 20 years and applied globally.

As time is valuable and scarce, the methodology is as follows:

Courses are intensive concentrating on the most demanding parts of the syllabus. Studies happen **mostly on weekends, rarely on weekdays as well.**

Interactive format of course study: tutors work through the topics with students. The major part of the course is **practicing exam-type questions** while at the same time the principles are explained. Tutors run through practical examples and exam questions to fully prepare candidates for the exam.

The program is based on training materials with comprehensive examples and their step by step guidance to their solutions. For all papers except F4 RUS and F6 RUS, we use **Kaplan books as ACCA approved books**, which contain a complete package of ACCA practice questions for self-study.

On-line support of participants by the tutors throughout the period of their self-study.

What is the course structure?

As all ACCA papers differ from each other, we put different amount of days for each course. The course structure depends on the Paper. The general structure is as follows:

- ▶ We start with an intensive introductory training session to put the exam into context and very quickly move on to an exam level of difficulty with practice questions to enable students to practice exam technique.
- ▶ We proceed with an interim training session covering most difficult topics of the syllabus with numerous practice questions.
- ▶ We conclude with an intensive revision training session during which all topics are briefly revised and candidates practice exam-level questions.
- ▶ Before the real exam, students take self-assessment mock examination, which is intended to be fully representative of the likely ACCA examination. Within several days after attempting a mock exam, students receive an e-mail with their exam results. This mock exam will allow students to evaluate their overall readiness for the real exam and adjust their preparation in the remaining weeks or days. In case of any questions students can contact tutor via email.
